## DYNAROUND RG (ROOF GUARD) SLIMLINE™

Fibergate's new ballasted rooftop guardrail system, DynaRound RG Slimline™, provides safety and fall protection on rooftop applications. While our RG system utilizes counter balance bases, the Slimline systems uses both counterbalance bases in addition to circular galvanized bases with less interference. Similar to our DynaRound RG system, each Slimline system is made of durable, weather-resistant fiberglass reinforced plastic (FRP) composite uprights and rails, galvanized steel base weights, and galvanized connector components. This system meets applicable safety standards in the U.S. and Canada to protect people working at heights.

DynaRound RG Slimline provides the utmost in safety by protecting against injuries or death from accidental falls from the roof. The weighted base system means there is no drilling into the roof to attach the system. This eliminates any damage to the roof that could result from the drilling, including potential sources of leaks.

### BENEFITS

**Lightweight:** Fibergate FRP products lessen impact on rooftop installations, reduce installation time, can eliminate the need for heavy lifting equipment, and reduce shipping costs.

**Long Service Life:** Fiberglass products provide outstanding durability and corrosion resistance in demanding applications, providing improved product life over traditional materials.

**UV Resistant:** UV Inhibitors in the resin matrix, along with a synthetic surfacing veil, provide optimum protection from the effect of UV weathering. In addition, the FRP rails, posts, and outriggers have an additional UV coating suitable for intense UV exposure.

**Low Install Cost:** Prefabricated FRP components and connectors using set screws for assembly eliminate drilling and almost all field cutting for a rapid, clean installation.

**Corrosion Resistant:** Fibergate® fiberglass products are known for their ability to provide corrosion resistance in the harshest environments.

**Low Maintenance:** The corrosion resistant properties of FRP are easy to clean and reduce or eliminate the need for sandblasting, scraping and painting.
